MUSICAL MERCHANDISE REVIEW

## SpeedLoader Series Floyd Rose

Floyd Rose has introduced the SpeedLoader series, described by the company as a radical advancement in guitar bridge and string design. The Speedloader Bridge and SpeedLoader Strings build upon the tuning stability, durability, and versatility of the original Floyd Rose locking tremolo. The integrated SpeedLoader bridge and SpeedLoader string design is said to allow a complete set of strings to be changed in less than one minute by eliminating the need for tuning keys, wrenches, string stretching, or major re-tuning.

The product is designed to retrofit on guitars with the original Floyd Rose locking tremolo and on most licensed Floyd Rose locking tremolos. The SpeedLoader Bridge will also be available on new models from the world's leading guitar manufacturers in the coming months. Nuts and nut housing for the SpeedLoader Bridge will be available in three widths (1.650", 1.6875" and 1.750") and three radius combinations (9.5", 12" and 17").
